PROJECT 1 · THE QUESTION

What would be our project idea if we had to create a video game and interactive experience using social network APIs, with multiplayer?

SCOPE

Video games & interactive experience

DIVERSIFIER 1

Social network APIs

DIVERSIFIER 2

Multiplayer

PROJECT 1 · THE IDEA

Drinking-Game Party Arena

A Discord Activity where friends in the same voice channel pick from a large library of drinking games (roulette, quizzes, votes, challenges) and play together in real time.

HOW IT ANSWERS THE QUESTION

Social network API

Discord provides identity, friend lists and voice, so players join with one click.

Multiplayer core

A game server keeps every round in sync across all players in the channel.

Video game experience

New games plug into the same core, so the library keeps growing.

PROJECT 2 · THE QUESTION

What would be our project idea if we had to create a robot or embedded system focused on wellness and health, with voice command and no screen?

SCOPE

Robot / embedded system

DIVERSIFIER 1

Wellness & health

DIVERSIFIER 2

Voice command, no screen

PROJECT 2 · THE IDEA

Halo, a Voice Wellness Companion

A small voice-activated device for the home that reminds users to hydrate, take breaks, sleep well and take medication, and guides short breathing and stretching exercises.

HOW IT ANSWERS THE QUESTION

Embedded system

A Raspberry Pi or microcontroller with microphones, a speaker and an LED ring.

Voice, no screen

Local wake word and offline commands; light and sound replace the display.

Wellness and health

Data stays local and encrypted. A wellness tool, not a medical device.

PROJECT 3 · THE QUESTION

What would be our project idea if we had to create a cybersecurity and digital trust project for users who do not subscribe, focused on culture and heritage?

SCOPE

Cybersecurity & digital trust

DIVERSIFIER 1

Users do not subscribe

DIVERSIFIER 2

Culture & heritage

PROJECT 3 · THE IDEA

Sceau, a Free Digital Seal for Living Heritage

A free, open-source tool for associations, artisans, storytellers and photographers to sign their digital works. Anyone can verify the seal in one click, without an account.

HOW IT ANSWERS THE QUESTION

Cybersecurity and trust

Cryptographic signatures prove authorship and reveal any alteration.

No subscription

Signing runs in the browser: no account, no fee, no data collection.

Culture and heritage

Protects photos, recordings, recipes and songs from misattribution and AI manipulation.
